◆ About Us

Zhejiang Jiuwang Flax Century Technology Co., Ltd. is a family-owned hat manufacturer with roots dating back to 1983. Headquartered in Eastern China, we specialize in crafting high-quality Straw Hats, Braided Hats, Ribbon Hats, and Bags, supported by our production facilities in China and Cambodia. Committed to excellence, we deliver premium products and outstanding service at competitive prices, serving retailers and wholesalers across Asia, Europe, North America, and South America.

Core Advantage

- International Production Base
- Global Supply Chain Deployment
- Strategic Hub For Global Market

Our Story:

Rooted in Craftsmanship, Connected to the World

Our Heritage in Zhejiang

Our story begins in Zhejiang, China—the heart of our craftsmanship.

Here, we master the art of braided straw and paper hats, blending traditional techniques with modern design. This is where our unwavering commitment to quality and heritage takes root.

Our Vision in Cambodia

As the world's focus turns to Southeast Asia, so does our footprint. Our new, modern facility in Cambodia is a strategic step forward. It strengthens our global supply chain, enhances our agility, and reaffirms our promise to meet international demand with greater efficiency.

Synergy for Your Success

The synergy between our Zhejiang base and Cambodia facility creates undeniable value for you:

Resilient Supply:

Dual manufacturing bases ensure reliable delivery and greater capacity.

Competitive Edge:

Leveraging Cambodia's trade advantages allows for more cost-effective solutions.

Global Speed:

Strategically located production enables faster logistics to key markets worldwide.

Our Promise:

From the meticulous touch in every hat to the seamless fulfillment of every order, we are your dedicated partner, bridging continents with skill and vision.

One Craft, Two Homes, Global Service.

Raw Material Control

We control quality from the very start by making our own paper braid in-house—from raw paper to finished braid. This vertical integration gives us full traceability, tighter QC on strength, color, and handfeel, and the ability to adjust specs quickly. The result is consistent material performance and lead times we can commit to with confidence.

Paper Braid

Paper Braid is crafted solely from paper thread. We offer a wide selection of colors and various braid widths. This versatile material caters to all price markets, from low to high-end, providing options for a diverse range of customers.

Poly Paper Braid

The Poly Paper Braid is one of our all-time bestsellers. This blend of polyester and recycled paper allows for various textures and feels, offering unique characteristics to each hat. This makes it versatile and practical for crafting all hat shapes. We offer over thousands different types of poly paper braid to suit diverse styles and preferences. Its unique composition provides both durability and a comfortable feel, making it suitable for various market segments.

Fine Paper Braid

Fine Paper Braid is designed for the mid-price to high-end market, offering a refined and premium look due to its thin braid width. This material is available in different textures: one option features a soft, delicate feel, while another provides a crushable yet resilient quality with a slight squishiness.

Poly Braid

Poly Braid is crafted from synthetic polyester material, renowned for its lightweight and crushable properties. These features make it an excellent choice for creating bucket hats and floppy hats. We offer a wide range of color options, catering to various styles and preferences, making poly braid a versatile and popular choice in hat-making.

Ribbon

Often referred to as Grosgrain, ribbon hats are popular worldwide, ideal for the affordable to mid-price market. The ribbon features a soft, cloth-like texture and a wide range of rich colors. While commonly used for bucket hats, it can be crafted into various styles like wide-brim, fedora, and cowboy hats. Additionally, it can be combined with natural or paper braids to create unique and versatile designs.

Paper Straw

Our Paper Straw offers versatility in its forms, with options for machine-woven flat sheets that are blocked into specific hat shapes for a premium and sleek appearance. Alternatively, we hand-weave the paper straw, resulting in hats with a more natural and organic look. This material is an excellent, more affordable alternative to Raffia, catering to budget-conscious and mid-price markets. Additionally, the paper straw can be dyed into various colors, providing a wide range of aesthetic options.

Seagrass

Seagrass straw, true to its name, is crafted from various seagrass varieties found in shallow coastal regions. This material imparts a natural tone, making it ideal for mid-price to high-end market hats. During the hat-making process, seagrass straw can be glazed and stiffened to achieve a dark yellow color or left in its natural soft-textured green hue, offering versatility in styling.

Wheat Straw

Wheat Straw is derived from the stalks of wheat plants. It can be braided or woven into various patterns, making it ideal for the mid-price to high-end market. From wider braid to finer braid, we offer multiple choices of wheat straw. This flexibility in braid width allows for a range of styles and price points, with finer braids offering a more refined and elegant appearance.

Raffia

Raffia straws are crafted from the leaves of the Raffia palm and are typically woven from a single light-brown braid. This material can also be hand-woven into hats, making it ideal for the mid-price to high-end market. Raffia hats are renowned for their durability and flexibility, thanks to the fibrous nature of the material. While most raffia hats maintain their natural light-brown color, the material can also be dyed in various hues. The organic composition enhances their longevity, offering a natural and sophisticated appearance.

Rush Straw

Rush Straw, made from rush grass, is a natural material valued for its affordability and durability, making it ideal for the low-price to mid-price market. Particularly popular in styles like lifeguard and fedora hats, rush straw is known for its sturdy construction and classic appeal. The material's resilience, including a degree of water resistance, ensures these hats are both comfortable and practical for everyday wear.

Hemp

Hemp is our newly developed material, sourced from the cannabis plant. Our hemp straw is blended with synthetic materials to provide a softer texture while maintaining a natural feel. Available in a variety of colors and adaptable to all hat shapes, this material is perfect for the high-end market. The combination of natural hemp and synthetic fibres not only enhances comfort but also adds a unique premium quality to the hats.
